

STEM Week

Wow! I have never seen a real life owl!

During STEM week we have been on a journey of discovery and creativity. With Lego education, we have explored different materials which has helped us to further our knowledge of the solar system, space, Earth and the moon. We have carried on learning about materials by inviting parents to support with creating vessels that can float and investigating which material work best. We had a visit from a Harris Hawk and Indian Owl and we were allowed to stroke them! We also made and painted our own class scientist heads- Hubble and Newton. We have learnt more about our chosen Scientist, it has been a really exciting week!

Playing with the Lego was really fun!
